Practice 4: Measuring Angles with a Protractor.....	7
Practice 5: Identifying Triangles	8
Practice 6: Computing the Interior Angles of a Triangle	9
Practice 7: Computing the Interior Angles of a Triangle	10
Practice 8: Identifying Polygons.....	11
Practice 9: Computing Angles in Quadrilaterals.....	12
Practice 10: Computing the Perimeter of Squares	13
Practice 11: Computing the Perimeter of Rectangles.....	14
Practice 12: Computing the Perimeter of Parallelograms	15
Practice 13: Computing the Perimeter of Other Quadrilaterals	16
Practice 14: Computing the Perimeter of Regular Polygons	17
Practice 15: Computing Area with Square Centimeters.....	18
Practice 16: Computing Area with Graph Paper.....	19
Practice 17: Computing the Area of Squares	20
Practice 18: Computing the Area of Rectangles	21
Practice 19: Computing the Area of Rectangles	22
Practice 20: Computing the Area of Parallelograms.....	23
Practice 21: Computing the Area of Parallelograms.....	24
Practice 22: Computing the Area of Triangles	25
Practice 23: Computing the Area of Triangles	26
Practice 24: Computing the Volume of a Cube.....	27
Practice 25: Computing the Volume of a Rectangular Prism.....	28
Practice 26: Computing the Volume of a Rectangular Prism.....	29
Practice 27: Identifying Radius, Diameter, and Circumference.....	30
Practice 28: Computing Circumference	31
Practice 29: Computing the Area of a Circle	32
Practice 30: Recognizing Symmetry	33
Practice 31: Recognizing Symmetry	34
Practice 32: Recognizing Congruence.....	35
Practice 33: Recognizing Similar Figures.....	36
Practice 34: Identifying Similar and Congruent Figures.....	37
Practice 35: Identifying Solid Figures.....	38
Practice 36: Identifying Faces, Edges, and Vertices.....	39
Test Practice 1.....	40
Test Practice 2.....	41
Test Practice 3.....	42
Test Practice 4.....	43
Test Practice 5.....	44
Test Practice 6.....	45
Answer Sheet.....	46
Answer Key	47

Practice 16

Reminder

The area of a rectangle is computed by multiplying the length times the width.

$$A = l \times w$$

Directions: Count the number of squares along the width of the rectangle. Count the number of squares along the length of the rectangle. Multiply the length times the width to compute the area of each rectangle.

1. _____ sq. units

6. _____ sq. units

2. _____ sq. units

7. _____ sq. units

3. _____ sq. units

8. _____ sq. units

4. _____ sq. units

9. _____ sq. units

5. _____ sq. units

10. _____ sq. units

Practice 26

Reminder

The volume of a rectangular prism is computed by multiplying the length times the width times the height of the prism.

$$V = l \times w \times h \text{ or } V = lwh$$

Directions: Compute the volume of each rectangular prism.

1.

5.

2.

6.

3.

7.

4.

8.
