

# Introduction

## For Parents and Teachers

**Mathematics 5** combines proven teaching methods with colorful pictures and illustrations to teach students basic math facts and concepts. Its use of practical applications helps students relate to math in the real world. Its incremental approach and spiral review (teaching concepts in small increments and continuous review) makes *Mathematics 5* an effective math course. The consistent, systematic review helps students retain what they have learned. The goal is mastery, not just exposure.

### How to Use Mathematics 5

Each **unit** follows a theme, introduced by a story and photographs relating to the theme. Many word problems and nuggets of information follow this theme.

The **header** in each lesson tells what unit and lesson is taught that day. It also tells which speed or mastery drill to administer.

The **colored teaching box** beginning each lesson teaches the new concept, followed by exercises to reinforce the concept. This concept is reviewed again just before *Sharpening Your Skills*.

**We Remember** follows the teaching lesson and its reviews. It also reviews concepts taught in earlier lessons. Students should be able to work through these exercises independently. A small reference number after each exercise indicates the page number where the concept was taught.

**Sharpening Your Skills** drills students in basic computation (using any of the four math operations), mental math, and fact focus. *Fact Focus* drills basic math facts and measurement equivalents.

**Lessons 5, 10, and 16** of each unit are quiz or test lessons. Most material has been reviewed five times before it is quizzed or tested. Quiz and test lessons include optional enrichment activities. They are neither reviewed nor tested. They are optional and just for fun.

The **Glossary, Reference Charts, and Index** are reference materials to help students work independently.

**Mathematics 5** will equip students with tools that will enable them to apply principles to math in everyday life. It enables students to see the beauty in numbers and to learn to appreciate math. We believe that mathematics should help students achieve the ultimate goal—loving, serving, and bringing glory to God.

### Course Materials

- › **Mathematics 5 Textbook**
- › **Student Packet**
  - Worksheets
  - Tests
  - Quizzes
  - Speed/Mastery Drills
- › **Teacher's Guide**
  - Resource CD
- › **Full Solution Answer Key**

# Unit 3

## Lesson 1 ..... 90

Solving Division  
Word Problems

## Lesson 2 ..... 93

Simplifying Mixed Numbers  
With Improper Fractions

## Lesson 3 ..... 96

Decimals and Fractions;  
Finding Averages

## Lesson 4 ..... 99

Rounding Decimals to Whole  
Numbers; Multiplying Decimals

## Lesson 5 ..... 102

Quiz 1

## Lesson 6 ..... 103

Formula for Finding  
the Area of a Rectangle

## Lesson 7 ..... 106

Using Digit Sums to Check  
Addition; Understanding Angles

## Lesson 8 ..... 109

Subtracting Fractions  
From Whole Numbers

## Lesson 9 ..... 112

Finding the Least Common  
Multiple; Measuring to the  
Fourth-Inch

## Lesson 10 ..... 115

Quiz 2

## Lesson 11 ..... 116

Dividing by Multiples of 10

## Lesson 12 ..... 119

Combining Like Integers

## Lesson 13 ..... 122

Formula for Finding  
the Area of a Square

## Lesson 14 ..... 125

Borrowing to Subtract Mixed  
Numbers With Like  
Denominators

## Lesson 15 ..... 128

Choosing Sensible  
Measurement Units: Weight

## Lesson 16 ..... 131

Unit 3 Test

# Unit 7

## Lesson 1 ..... 266

Multiplying Whole Numbers,  
Mixed Numbers, and Fractions

## Lesson 2 ..... 269

Changing Ratios to Simplest Form

## Lesson 3 ..... 272

Formula for Finding  
the Area of a Triangle

## Lesson 4 ..... 275

Finding a Fraction  
of a Number Mentally

## Lesson 5 ..... 278

Quiz 1

## Lesson 6 ..... 279

Understanding Percents

## Lesson 7 ..... 282

Understanding  
Prime and  
Composite  
Numbers

## Lesson 8 ..... 285

Changing Fractions  
to Decimals and Percents

## Lesson 9 ..... 288

Using Cross Multiplication  
to Solve Proportions

## Lesson 10 ..... 291

Quiz 2

## Lesson 11 ..... 292

Solving Word  
Problems With  
Remainders

## Lesson 12 ..... 295

Introducing Reciprocals

## Lesson 13 ..... 298

Learning Metric Prefixes

## Lesson 14 ..... 301

Dividing Fractions

## Lesson 15 ..... 304

Abbreviating  
Metric Measurements

## Lesson 16 ..... 307

Unit 7 Test

# Unit 10

## **Lesson 1 ..... 398**

Comparing Prices in Word Problems

## **Lesson 2 ..... 401**

Classifying Triangles by Sides

## **Lesson 3 ..... 404**

Estimating Length

## **Lesson 4 ..... 407**

Comparing Fractions Using Decimal Equivalents

## **Lesson 5 ..... 410**

Quiz 1

## **Lesson 6 ..... 411**

Intersection of Sets

## **Lesson 7 ..... 414**

The Commutative Properties of Addition and Multiplication

## **Lesson 8 ..... 417**

Reading Roman Numerals Through 2,999

## **Lesson 9 ..... 420**

Rounding Decimals to Estimate

## **Lesson 10 ..... 423**

Quiz 2

## **Lesson 11 ..... 424**

Taking Shortcuts in Multiplication

## **Lesson 12 ..... 427**

Introducing Biological Symmetry

## **Lesson 13 ..... 430**

Measuring With Precision

## **Lesson 14 ..... 433**

Comparing Estimated Products With Exact Products

## **Lesson 15 ... 436**

Recognizing Incorrect Calculator Results

## **Lesson 16 .... 439**

Unit 10 Test

## Using Digit Sums to Check Division

## Using Digit Sums to Check Division

Digit sums can be used to check division problems. Use circles and boxes to keep the digit sums organized while checking.

## Steps to Check Division Using Digit Sums

- 1 Find the digit sum of the divisor, of the quotient, and of the remainder and circle them.
- 2 Multiply the digit sums of the divisor and the quotient and add the digit sum of the remainder. Find the digit sum of that answer and put a box around it.
- 3 Find the digit sum of the dividend and put a box around it.
- 4 Compare the digit sums in the boxes. If they are not the same, the answer is wrong.

$$\begin{array}{r} \textcircled{2} \times \textcircled{8} + \textcircled{6} = \boxed{4} \\ 38 \overline{) 24,610} \text{ R} \boxed{24} \end{array}$$

Copy and check using digit sums. Circle any wrong answers.

$$1. 46 \overline{) 35,402} \begin{array}{l} 769 \\ \text{R} 28 \end{array}$$

$$2. 35 \overline{) 28,340} \begin{array}{l} 809 \\ \text{R} 15 \end{array}$$

$$3. 27 \overline{) 985} \begin{array}{l} 36 \\ \text{R} 13 \end{array}$$

## We Remember

Write each whole number and mixed number as an improper fraction.

$$4. 21$$

p. 251

$$5. 15$$

p. 251

$$6. 5\frac{1}{2}$$

p. 251

$$7. 4\frac{4}{5}$$

p. 251

Copy, solve, and check the equations.

$$8. n + 7 = 17$$

p. 241, 251

$$9. n + 7 = 9$$

p. 241, 251

$$10. x - 2 = 9$$

p. 241, 251

$$11. x - 3 = 10$$

p. 241, 251

Did You Know?

India has been the spice capital of the world for centuries.

Write  $\in$  or  $\notin$  to tell whether the item is an element of the set.

**Set F** kinds of transportation

**18.** boat  
p. 360

**19.** airplane  
p. 360

**20.** telephone  
p. 360

**Copy, solve, and check.**

**21.**  $12 = n + 5$   
p. 251, 354

**22.**  $7 = x - 20$   
p. 251, 354

**23.**  $36 = n + 12$   
p. 251, 354

**24.**  $9 = x - 10$   
p. 251, 354

**Convert the units of measure.**

**25.** 55 oz = \_\_\_\_ lb and \_\_\_\_ oz  
p. 367

**26.** 17 pt = \_\_\_\_ qt and \_\_\_\_ pt  
p. 367

**Write the ordered pair for each point.**

**27.** B  
p. 370

**28.** G  
p. 370

**Plot the points on the grid.**

**29.** Z (7, 2)  
p. 376

**30.** O (6, 3)  
p. 376

**Set up a proportion to find the answer.**

**31.** 5 yd = \_\_\_\_ in  
p. 336

**32.** 128 c = \_\_\_\_ qt  
p. 336

**33.** 960 min = \_\_\_\_ hr  
p. 336

**Round each number to the place indicated.**

**34.** 3.026 nearest hundredth  
p. 244

**35.** 0.233 nearest tenth  
p. 244

**36.** 0.1259 nearest thousandth  
p. 244

**Solve the word problems.**

**37.** In the rubble of her home, Maria's mother finds 3 bowls to sell for \$0.40 each. With the money, she buys 6 mangoes. How much does each mango cost? 

**38.** With the \$2.00 she earns at the coffee plantation, Maria's mother buys 1 pineapple for \$0.80 and half a dozen lemons for \$0.90. How much money does Maria's mother have left? 

Write  $<$ ,  $>$ , or  $=$  to show how the numbers compare.

43. 4.3 \_\_\_\_ 4.30  
p. 160

44. 0.501 \_\_\_\_ 0.05  
p. 160

45. 6.2 \_\_\_\_ 6.021  
p. 160

46. 0.013 \_\_\_\_ 0.003  
p. 49

47. 4.3 \_\_\_\_ 4.1  
p. 49

48. 2.22 \_\_\_\_ 2.12  
p. 49

49. -5 \_\_\_\_ 1  
p. 62

50. -4 \_\_\_\_ 6  
p. 62

51. 1 \_\_\_\_ -7  
p. 62

Solve the word problems.

52. One week Maria's father carves 2 dozen wooden spoons. If he sells them for 5¢ each, how much does he make that week? 

53. The next week Maria's father carves 36 spoons. He sells all but 5 of the spoons. How many spoons does he sell that week?

54. Ricardo uses 2 meters of cedar wood to make large spoons and 72 centimeters to make small spoons. How much more wood does he use to make large spoons than small spoons?

## Sharpening Your Skills

**Computation** Copy and solve.

55.  $2\frac{2}{5} \times \frac{3}{15}$

56.  $2\frac{5}{8} \times 4$

57.  $\frac{7}{8} \times \frac{1}{2}$

58.  $\frac{5}{6} \times \frac{1}{4}$

59.  $38 \overline{)2,399}$

60.  $67 \overline{)6,234}$

61.  $4 \overline{)924}$

62.  $7 \overline{)1,078}$

63.  $0.03 \times 0.432$

64.  $2.2 \times 0.006$

65.  $79 - 8.126$

66.  $9.1 + 6.139$

**Mental Math** Write the answers.

67.  $59.6 \div 10$

68.  $20 \div 1,000$

69.  $13.7 \times 1,000$

70.  $0.7 \times 1,000$

## Quiz 1

Fascinating  
Discoveries

## Tiger Cub Facts

Each picture represents a number. Use the picture math problems to figure out what number each picture represents. Write the number that goes with the picture. The answer to each picture math problem is the answer for the blank in the sentence.

?

?

?

3

?

1.   $\div$   = 

A tiger cub stays with its mother for about \_\_\_\_ years.

2.   $-$   = 

Normally a mother tiger will have about \_\_\_\_ cubs in each litter.

3.   $+$    $+$   = 

Sometimes a litter may have \_\_\_\_ cubs.

4.   $-$   = 

When tiger cubs are about \_\_\_\_ months old, they start eating solid food.

5.   $-$   = 

When tiger cubs are about \_\_\_\_ months old, they start following their mother out of the den.
