

GRADE 4 VOLUME 2

enVision<sup>®</sup> Mathematics

SAVVAS

Hi, we're here to help you.  
Let's have a great year!

I'm Daniel.

I'm Marta.

I'm Emily.

I'm Jackson.

I'm Zeke.

I'm Carlos.

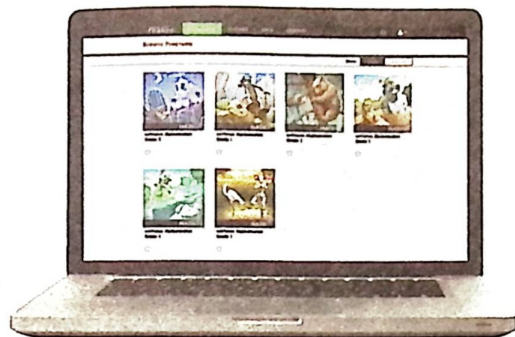

I'm Jada.

I'm Alex.

## TOPICS

- 1 Generalize Place Value Understanding
- 2 Fluently Add and Subtract Multi-Digit Whole Numbers
- 3 Use Strategies and Properties to Multiply by 1-Digit Numbers
- 4 Use Strategies and Properties to Multiply by 2-Digit Numbers
- 5 Use Strategies and Properties to Divide by 1-Digit Numbers
- 6 Use Operations with Whole Numbers to Solve Problems
- 7 Factors and Multiples
- 8 Extend Understanding of Fraction Equivalence and Ordering
- 9 Understand Addition and Subtraction of Fractions
- 10 Extend Multiplication Concepts to Fractions
- 11 Represent and Interpret Data on Line Plots
- 12 Understand and Compare Decimals
- 13 Measurement: Find Equivalence in Units of Measure
- 14 Algebra: Generate and Analyze Patterns
- 15 Geometric Measurement: Understand Concepts of Angles and Angle Measurement
- 16 Lines, Angles, and Shapes

## TOPIC 7 in volume 1

# Factors and Multiples

enVision®STEM Project .....	257
Review What You Know .....	258
Pick a Project .....	259
3-ACT MATH Preview: Can-Do Attitude .....	260

<b>7-1 Understand Factors</b> .....	261
<b>7-2 Factors</b> .....	265
<b>7-3 PROBLEM SOLVING Repeated Reasoning</b> .....	269
<b>7-4 Prime and Composite Numbers</b> .....	173
<b>7-5 Multiples</b> .....	277

Fluency Practice Activity .....	281
Vocabulary Review .....	282
Reteaching .....	283
Topic Assessment Practice .....	285
Topic Performance Task .....	287

This shows how fraction strips can be used to determine equivalent fractions.

## TOPIC 8 Extend Understanding of Fraction Equivalence and Ordering

enVision®STEM Project .....	289
Review What You Know .....	290
Pick a Project .....	291

<b>8-1</b> Equivalent Fractions: Area Models .....	293
--	-----

<b>8-2</b> Equivalent Fractions: Number Lines .....	297
---	-----

<b>8-3</b> Generate Equivalent Fractions: Multiplication .....	301
--	-----

<b>8-4</b> Generate Equivalent Fractions: Division .....	305
--	-----

<b>8-5</b> Use Benchmarks to Compare Fractions .....	309
--	-----

<b>8-6</b> Compare Fractions. ....	313
------------------------------------	-----

<b>8-7</b> <b>PROBLEM SOLVING</b> Construct Arguments. ....	317
---	-----

Fluency Practice Activity .....	321
Vocabulary Review .....	322
Reteaching .....	323
Topic Assessment Practice .....	325
Topic Performance Task .....	327

This shows how  
you can use fraction strips  
to model the addition  
of fractions.

## TOPIC 9 Understand Addition and Subtraction of Fractions

enVision®STEM Project .....	329
Review What You Know .....	330
Pick a Project .....	331
3-ACT MATH Preview: Just Add Water .....	332

9-1	Model Addition of Fractions .....	333
9-2	Decompose Fractions .....	337
9-3	Add Fractions with Like Denominators .....	341
9-4	Model Subtraction of Fractions .....	345
9-5	Subtract Fractions with Like Denominators .....	349
9-6	Add and Subtract Fractions with Like Denominators ....	353
9-7	Model Addition and Subtraction of Mixed Numbers ....	357
9-8	Add Mixed Numbers .....	361
9-9	Subtract Mixed Numbers .....	365
9-10	<b>PROBLEM SOLVING</b> Model with Math .....	369

Fluency Practice Activity .....	373
Vocabulary Review .....	374
Reteaching .....	375
Topic Assessment Practice .....	377
Topic Performance Task .....	379

You can use a number line to help multiply fractions and whole numbers.

$$4 \times \frac{1}{3} = \frac{4}{3}$$

## TOPIC 10 Extend Multiplication Concepts to Fractions

enVision®STEM Project .....	381
Review What You Know .....	382
Pick a Project .....	383

<b>10-1</b> Fractions as Multiples of Unit Fractions .....	385
--	-----

<b>10-2</b> Multiply a Fraction by a Whole Number: Use Models ...	389
---	-----

<b>10-3</b> Multiply a Fraction by a Whole Number: Use Symbols ...	393
--	-----

<b>10-4</b> Solve Time Problems .....	397
---------------------------------------	-----

<b>10-5</b> <b>PROBLEM SOLVING</b> Model with Math .....	401
--	-----

Fluency Practice Activity .....	405
Vocabulary Review .....	406
Reteaching .....	407
Topic Assessment Practice .....	409
Topic Performance Task .....	411

This shows  
how to create and  
use a line plot to  
solve problems.

## TOPIC 11 Represent and Interpret Data on Line Plots

enVision®STEM Project .....	413
Review What You Know .....	414
Pick a Project .....	415
3-ACT MATH Preview: It's a Fine Line .....	416

11-1

Read Line Plots .....	417
-----------------------	-----

11-2

Make Line Plots .....	421
-----------------------	-----

11-3

Use Line Plots to Solve Problems .....	425
--	-----

11-4

<b>PROBLEM SOLVING</b> Critique Reasoning .....	429
---	-----

Fluency Practice Activity .....	433
Vocabulary Review .....	434
Reteaching .....	435
Topic Assessment Practice .....	437
Topic Performance Task .....	439

This shows how  
to represent 1.64 or  
 $1\frac{64}{100}$  using grids.

$$1.64 = 1\frac{64}{100}$$

## TOPIC 12 Understand and Compare Decimals

enVision®STEM Project .....	441
Review What You Know .....	442
Pick a Project .....	443

<b>12-1</b> Fractions and Decimals .....	445
<b>12-2</b> Fractions and Decimals on the Number Line .....	449
<b>12-3</b> Compare Decimals .....	453
<b>12-4</b> Add Fractions with Denominators of 10 and 100 .....	457
<b>12-5</b> Solve Word Problems Involving Money .....	461
<b>12-6</b> <b>PROBLEM SOLVING</b> Look For and Use Structure .....	465

Fluency Practice Activity .....	469
Vocabulary Review .....	470
Reteaching .....	471
Topic Assessment Practice .....	473
Topic Performance Task .....	475

This shows  
how metric units  
are related.

DATA

### Metric Units of Length

$$1 \text{ m} = 1,000 \text{ mm}$$

$$1 \text{ cm} = 10 \text{ mm}$$

$$1 \text{ m} = 100 \text{ cm}$$

$$1 \text{ km} = 1,000 \text{ m}$$

## TOPIC 13 Measurement: Find Equivalence in Units of Measure

enVision®STEM Project .....	477
Review What You Know .....	478
Pick a Project .....	479
3-ACT MATH Preview: A Pint's a Pound .....	480

<b>13-1</b> Equivalence with Customary Units of Length .....	481
<b>13-2</b> Equivalence with Customary Units of Capacity .....	485
<b>13-3</b> Equivalence with Customary Units of Weight .....	489
<b>13-4</b> Equivalence with Metric Units of Length .....	493
<b>13-5</b> Equivalence with Metric Units of Capacity and Mass ....	497
<b>13-6</b> Solve Perimeter and Area Problems .....	501
<b>13-7</b> <b>PROBLEM SOLVING</b> Precision .....	505

Fluency Practice Activity .....	509
Vocabulary Review .....	510
Reteaching .....	511
Topic Assessment Practice .....	513
Topic Performance Task .....	515

This shows how  
to use a rule to generate  
a pattern.

## TOPIC 14 Algebra: Generate and Analyze Patterns

enVision®STEM Project .....	517
Review What You Know .....	518
Pick a Project .....	519

<b>14-1</b> <b>Number Sequences</b> .....	521
---	-----

<b>14-2</b> <b>Patterns: Number Rules</b> .....	525
---	-----

<b>14-3</b> <b>Patterns: Repeating Shapes</b> .....	529
---	-----

<b>14-4</b> <b>PROBLEM SOLVING Look For and Use Structure</b> .....	533
---	-----

Fluency Practice Activity .....	537
Vocabulary Review .....	538
Reteaching .....	539
Topic Assessment Practice .....	541
Topic Performance Task .....	543

This shows  
how to measure and  
draw angles.

## TOPIC 15 Geometric Measurement: Understand Concepts of Angles and Angle Measurement

enVision®STEM Project .....	545
Review What You Know .....	546
Pick a Project .....	547
3-ACT MATH Preview: Game of Angles.....	548

<b>15-1</b> Lines, Rays, and Angles .....	549
<b>15-2</b> Understand Angles and Unit Angles.....	553
<b>15-3</b> Measure with Unit Angles .....	557
<b>15-4</b> Measure and Draw Angles .....	561
<b>15-5</b> Add and Subtract Angle Measures .....	565
<b>15-6</b> <b>PROBLEM SOLVING</b> Use Appropriate Tools.....	569

Fluency Practice Activity.....	573
Vocabulary Review.....	574
Reteaching.....	575
Topic Assessment Practice .....	577
Topic Performance Task .....	579

This shows how to  
draw lines of symmetry  
in a figure.

## TOPIC 16 Lines, Angles, and Shapes

# Extend Understanding of Fraction Equivalence and Ordering

**Essential Questions:** What are some ways to name the same part of a whole? How can you compare fractions with unlike numerators and denominators?

## Digital Resources

Some animals use their senses differently from humans. The entire body of a catfish is covered with taste-sensitive cells.

They use their sense of taste to locate food that is far away in the water.

Lots of animals have special ways of receiving information. Here is a project about senses.

## enVision STEM Project: Senses

**Do Research** Use the Internet or other resources to find information about how animals use special senses, such as echolocation, electricity, or magnetism. Include information about where the animal lives and how the special sense is used.

**Journal: Write a Report** Include what you found. Also in your report:

- Some spiders rely on sight to receive information about food. Most spiders have 8 eyes. Draw a picture of a spider with many eyes, using some shaded circles as eyes and some empty circles as eyes.
- Write a fraction that names shaded spider eyes to total spider eyes. Write three equivalent fractions.

# Review What You Know

## Vocabulary

Choose the best term from the box.  
Write it on the blank.

- denominator
- numerator
- fraction
- unit fraction

1. A symbol, such as  $\frac{2}{3}$  or  $\frac{1}{2}$ , used to name part of a whole, part of a set, or a location on a number line is called a \_\_\_\_\_.
2. The number above the fraction bar in a fraction is called the \_\_\_\_\_.
3. A fraction with a numerator of 1 is called a \_\_\_\_\_.

## Unit Fractions

Write a fraction for each statement.

4. 2 copies of  $\frac{1}{6}$  is \_\_\_\_\_.
5. 3 copies of  $\frac{1}{3}$  is \_\_\_\_\_.
6. 4 copies of  $\frac{1}{5}$  is \_\_\_\_\_.
7. 2 copies of  $\frac{1}{10}$  is \_\_\_\_\_.
8. 7 copies of  $\frac{1}{12}$  is \_\_\_\_\_.
9. 3 copies of  $\frac{1}{8}$  is \_\_\_\_\_.

## Fraction Concepts

Write the fraction shown by each figure.

## Parts of Wholes

16. **Construct Arguments** Is  $\frac{1}{4}$  of the figure below green? Explain.

17. This picture shows a square. Shade in  $\frac{3}{4}$  of the square.

PROJECT  
8A

How much do you know  
about the Indianapolis  
Motor Speedway?

**Project:** Create a Fraction  
Game

PROJECT  
8B

Who does all the stage work  
for a play or musical?

**Project:** Build a Model

# What Are Some Ways to Name the Same Part of a Whole?

James ate part of the pizza shown in the picture at the right. He said  $\frac{5}{6}$  of the pizza is left. Cardell said  $\frac{10}{12}$  of the pizza is left. Who is correct?

fraction  $\left\{ \begin{array}{l} \frac{5}{6} \end{array} \right.$  ← numerator  
← denominator

Equivalent fractions name the same part of the same whole.

## One Way

Use an area model. Draw a rectangle and divide it into sixths. Shade  $\frac{5}{6}$ . Then divide the rectangle into twelfths.

The number and size of parts differ, but the shaded part of each rectangle is the same.  $\frac{5}{6}$  and  $\frac{10}{12}$  are equivalent fractions.

## Another Way

Use a different area model. Draw a circle and divide it into sixths. Shade  $\frac{5}{6}$ . Then divide the circle into twelfths.

The number and size of parts differ, but the shaded part of each circle is the same.  $\frac{5}{6}$  and  $\frac{10}{12}$  are equivalent fractions.

Both James and Cardell are correct because  $\frac{5}{6} = \frac{10}{12}$ .

**Convince Me! Reasoning** Mia ate  $\frac{1}{4}$  of a pizza. Matt ate  $\frac{2}{8}$  of another pizza. Did Mia and Matt eat the same amount of pizza? Explain.

# ★ Guided Practice

## Do You Understand?

1. Use the area model to explain why  $\frac{3}{4}$  and  $\frac{9}{12}$  are equivalent.

## Do You Know How?

For 2-3, use the area model to solve each problem.

2. Find the missing numerator.

$$\frac{2}{4} = \frac{\square}{8}$$

3. Find the missing numerator.

$$\frac{1}{3} = \frac{\square}{6}$$

# ★ Independent Practice ★

4. Write a fraction equivalent to  $\frac{1}{5}$ .

5. Write two fractions equivalent to  $\frac{4}{12}$ .

6. Write a fraction equivalent to  $\frac{2}{6}$ .

7. Write two fractions equivalent to  $\frac{2}{3}$ .

For 8-15, draw an area model or use fraction strips to solve each problem.

8.  $\frac{2}{8} = \frac{\square}{4}$

9.  $\frac{2}{4} = \frac{\square}{8}$

10.  $\frac{1}{2} = \frac{\square}{6}$

11.  $\frac{3}{3} = \frac{6}{\square}$

12.  $\frac{1}{5} = \frac{\square}{10}$

13.  $\frac{5}{6} = \frac{10}{\square}$

14.  $\frac{8}{12} = \frac{2}{\square}$

15.  $\frac{4}{5} = \frac{8}{\square}$

# Problem Solving

16. **enVision® STEM** Monarch butterflies migrate when they sense daylight hours are shorter and temperatures get colder. Write two equivalent fractions for the part of the migration a monarch butterfly can complete in 1 week.

Travel  $\frac{1}{5}$  of the total migration in 1 week

17. **Make Sense and Persevere** Garrett buys lunch for himself and his friend. He buys 2 sandwiches, 2 fries, and 2 malts. How much did Garrett spend on lunch?

Menu	
Sandwich	\$8
Hot Dog	\$2
Fries	\$3
Soda	\$2
Shake/Malt	\$4

18. Connor said, "To the nearest hundred, I've attended school for 800 days of my life!" Write three numbers that could be the actual number of days Connor has attended school.

19. **Higher Order Thinking** Josh, Lisa, and Vicki each ate  $\frac{1}{4}$  of their own pizza. Each pizza was the same size, but Josh ate 1 slice, Lisa ate 2 slices, and Vicki ate 3 slices. How is this possible?

## Assessment Practice

20. Select all the fractions that are equivalent to  $\frac{2}{3}$ . Use the area models to help.

- ☐  $\frac{3}{6}$   
☐  $\frac{8}{12}$   
☐  $\frac{4}{8}$   
☐  $\frac{4}{6}$   
☐  $\frac{1}{2}$

21. Select all the pairs that are equivalent fractions. Use the area models to help.

- ☐  $\frac{1}{4}, \frac{2}{8}$   
☐  $\frac{3}{4}, \frac{6}{8}$   
☐  $\frac{7}{8}, \frac{3}{4}$   
☐  $\frac{8}{8}, \frac{4}{4}$   
☐  $\frac{1}{2}, \frac{2}{2}$

Name \_\_\_\_\_

Activity

## Solve & Share

Suppose you have a ruler showing fourths. Use your ruler to name a fraction that is equivalent to  $\frac{2}{4}$ . Tell how you know the fraction is equivalent.

You can use rulers or number lines to help solve problems.

$\frac{2}{4}$

## Lesson 8-2

### Equivalent Fractions: Number Lines

#### I can ...

name the same point on a number line using equivalent fractions.

**I can also** choose and use a math tool to help solve problems.

**Look Back! Model with Math** Do you think there is more than one fraction equivalent to  $\frac{2}{4}$ ? Draw a picture to explain.

# How Can You Use a Number Line to Explain Why Fractions Are Equivalent?

Sal rode his bike  $\frac{3}{4}$  mile to school. Name two fractions that are equivalent to  $\frac{3}{4}$ .

A number line is another appropriate tool for finding equivalent fractions.

B Show  $\frac{3}{4}$  on the number line.

Divide each fourth into two equal parts to show eighths.

Divide each fourth into three equal parts to show twelfths.

$\frac{3}{4}$ ,  $\frac{6}{8}$ , and  $\frac{9}{12}$  are at the same point on the number lines that are all the same length.  $\frac{6}{8}$  and  $\frac{9}{12}$  are equivalent to  $\frac{3}{4}$ .

$$\frac{3}{4} = \frac{6}{8} = \frac{9}{12}$$

**Convince Me!** The number and size of each part on two number lines are different. Can the number lines show equivalent fractions? Use the number lines above to explain.

## Another Example!

You can use a number line to find equivalent fractions that are greater than or equal to 1.

## ☆ Guided Practice

### Do You Understand?

1. Use the number line above to write a fraction equivalent to  $\frac{9}{6}$ . Why are the fractions equivalent? Explain.

### Do You Know How?

For 2-3, use the number line below.

2. Write an equivalent fraction for  $\frac{1}{3}$ .
3. Write an equivalent fraction for  $\frac{1}{2}$ .

## ☆ Independent Practice ☆

For 4-7, use the number line to find equivalent fractions. Circle the correct answers.

4. Which of the following fractions is an equivalent fraction for point A?

$$\frac{1}{4} \quad \frac{1}{3} \quad \frac{2}{3} \quad \frac{1}{6} \quad \frac{2}{6}$$

5. Which of the following fractions is an equivalent fraction for point B?

$$\frac{11}{12} \quad \frac{12}{12} \quad \frac{13}{12} \quad \frac{7}{6} \quad \frac{6}{6}$$

6. Which of the following fractions is an equivalent fraction for point C?

$$\frac{8}{6} \quad \frac{2}{3} \quad \frac{1}{2} \quad \frac{3}{2} \quad \frac{6}{4}$$

7. Which of the following fractions is an equivalent fraction for point D?

$$\frac{6}{5} \quad \frac{10}{6} \quad \frac{3}{2} \quad \frac{6}{10} \quad \frac{5}{3}$$

Name \_\_\_\_\_

Activity

## Solve & Share

Wayne bought a box of muffins. Four sixths of the muffins are blueberry. Write a fraction equivalent to  $\frac{4}{6}$ . *Solve this problem any way you choose.*

What can you draw to model with math to help represent the problem? *Show your work in the space below!*

## Lesson 8-3

### Generate Equivalent Fractions: Multiplication

#### I can ...

use multiplication to find equivalent fractions.

**I can also** model with math to solve problems.

**Look Back!** How are the numerator and denominator of your fraction related to the numerator and denominator of  $\frac{4}{6}$ ?
