

VOLUME 2

 enVision® Mathematics

SAVVAS

CONTENTS

TOPICS

- 1 Use Positive Rational Numbers
- 2 Integers and Rational Numbers
- 3 Numeric and Algebraic Expressions
- 4 Represent and Solve Equations and Inequalities
- 5 Understand and Use Ratio and Rate
- 6 Understand and Use Percent
- 7 Solve Area, Surface Area, and Volume Problems
- 8 Display, Describe, and Summarize Data

Use Positive Rational Numbers

Topic Opener	2
enVision® STEM Project	4
Review What You Know	5
Math Literacy Activity	6
Pick a Project	7
1-1 Fluently Add, Subtract, and Multiply Decimals	9
1-2 Fluently Divide Whole Numbers and Decimals	15
1-3 Multiply Fractions	21
Mid-Topic Checkpoint	27
Mid-Topic Performance Task	28
3-Act Mathematical Modeling: Stocking Up	29
1-4 Understand Division with Fractions	33
1-5 Divide Fractions by Fractions	39
1-6 Divide Mixed Numbers	45
1-7 Solve Problems with Rational Numbers	51
Topic Review	57
Fluency Practice Activity	61

Integers and Rational Numbers

Topic Opener	62
enVision® STEM Project	64
Review What You Know	65
Math Literacy Activity	66
Pick a Project	67
2-1 Understand Integers	69
2-2 Represent Rational Numbers on the Number Line	75
2-3 Absolute Values of Rational Numbers	81
Mid-Topic Checkpoint	87
Mid-Topic Performance Task	88
2-4 Represent Rational Numbers on the Coordinate Plane	89
3-Act Mathematical Modeling: The Ultimate Throw	95
2-5 Find Distances on the Coordinate Plane	99
2-6 Represent Polygons on the Coordinate Plane	105
Topic Review	111
Fluency Practice Activity	115

Numeric and Algebraic Expressions

Topic Opener	116
enVision® STEM Project	118
Review What You Know	119
Math Literacy Activity	120
Pick a Project	121
3-1 Understand and Represent Exponents	123
3-2 Find Greatest Common Factor and Least Common Multiple	129
3-3 Write and Evaluate Numerical Expressions	137
Mid-Topic Checkpoint	143
Mid-Topic Performance Task	144
3-4 Write Algebraic Expressions	145
3-5 Evaluate Algebraic Expressions	151
3-Act Mathematical Modeling: The Field Trip	157
3-6 Generate Equivalent Expressions	161
3-7 Simplify Algebraic Expressions	167
Topic Review	173
Fluency Practice Activity	177

Represent and Solve Equations and Inequalities

Topic Opener	178
enVision® STEM Project	180
Review What You Know	181
Math Literacy Activity	182
Pick a Project	183
4-1 Understand Equations and Solutions	185
4-2 Apply Properties of Equality	191
4-3 Write and Solve Addition and Subtraction Equations	197
4-4 Write and Solve Multiplication and Division Equations	203
4-5 Write and Solve Equations with Rational Numbers	209
Mid-Topic Checkpoint	217
Mid-Topic Performance Task	218
4-6 Understand and Write Inequalities	219
4-7 Solve Inequalities	225
 3-Act Mathematical Modeling: Checking a Bag	231
4-8 Understand Dependent and Independent Variables	235
4-9 Use Patterns to Write and Solve Equations	241
4-10 Relate Tables, Graphs, and Equations	247
Topic Review	253
Fluency Practice Activity	259

Understand and Use Ratio and Rate

Topic Opener	260
enVision® STEM Project	262
Review What You Know	263
Math Literacy Activity	264
Pick a Project	265
5-1 Understand Ratios	267
5-2 Generate Equivalent Ratios	273
5-3 Compare Ratios	279
5-4 Represent and Graph Ratios	285
Mid-Topic Checkpoint	291
Mid-Topic Performance Task	292
5-5 Understand Rates and Unit Rates	293
5-6 Compare Unit Rates	299
5-7 Solve Unit Rate Problems	305
3-Act Mathematical Modeling: Get in Line	311
5-8 Ratio Reasoning: Convert Customary Units	315
5-9 Ratio Reasoning: Convert Metric Units	321
5-10 Relate Customary and Metric Units	327
Topic Review	333
Fluency Practice Activity	339

Understand and Use Percent

Topic Opener	340
enVision® STEM Project	342
Review What You Know	343
Math Literacy Activity	344
Pick a Project	345
6-1 Understand Percent	347
6-2 Relate Fractions, Decimals, and Percents	353
6-3 Represent Percents Greater Than 100 or Less Than 1	359
Mid-Topic Checkpoint	365
Mid-Topic Performance Task	366
6-4 Estimate to Find Percent	367
6-5 Find the Percent of a Number	373
6-6 Find the Whole Given a Part and the Percent	379
3-Act Mathematical Modeling: Ace the Test	385
Topic Review	389
Fluency Practice Activity	393

Solve Area, Surface Area, and Volume Problems

Topic Opener	394
enVision® STEM Project	396
Review What You Know	397
Math Literacy Activity	398
Pick a Project	399
 Find Areas of Parallelograms and Rhombuses	401
 Solve Triangle Area Problems	407
 Find Areas of Trapezoids and Kites	413
 Find Areas of Polygons	419
Mid-Topic Checkpoint	425
Mid-Topic Performance Task	426
 Represent Solid Figures Using Nets	427
 3-Act Mathematical Modeling: That's a Wrap	433
 Find Surface Areas of Prisms	437
 Find Surface Areas of Pyramids	443
 Find Volume with Fractional Edge Lengths	449
Topic Review	455
Fluency Practice Activity	461

Display, Describe, and Summarize Data

Topic Opener	462

Review What You Know	465
Math Literacy Activity	466
Pick a Project	467
8-1 Recognize Statistical Questions	469
8-2 Summarize Data Using Mean, Median, Mode, and Range	475
8-3 Display Data in Box Plots	483
8-4 Display Data in Frequency Tables and Histograms	489
Mid-Topic Checkpoint	495
Mid-Topic Performance Task	496
8-5 Summarize Data Using Measures of Variability	497
8-6 Choose Appropriate Statistical Measures	503
8-7 Summarize Data Distributions	509
3-Act Mathematical Modeling: Vocal Range	515
Topic Review	519
Fluency Practice Activity	523

Explore It!

A band just released an album that contains both pop songs and R&B (rhythm and blues) songs.

Lesson 5-1

Understand Ratios

Go Online

I can...

use a ratio to describe the relationship between two quantities.

A. How can you describe the relationship between the number of pop songs and the number of R&B songs on the album?

B. How does the bar diagram represent the relationship between the number of pop songs and the number of R&B songs?

Focus on math practices

Reasoning Another album has 2 pop songs and 10 R&B songs. Draw a bar diagram that you could use to represent the relationship between the number of pop songs and the number of R&B songs.

Essential Question What is a mathematical way to compare quantities?

EXAMPLE 1

Write Ratios to Compare Quantities

Scan for
Multimedia

Tom's Pet Service takes care of cats and dogs. Currently, there are more dogs than cats. Compare the number of cats to the number of dogs. Then compare the number of cats to the total number of pets at Tom's Pet Service.

A **ratio** is a relationship in which for every **x** units of one quantity there are **y** units of another quantity.

A ratio can be written three ways.

x to **y**

x:**y**

$\frac{x}{y}$

The quantities **x** and **y** in a ratio are called **terms**.

Use a ratio to compare the number of cats to the number of dogs.

14 to 17

14:17

$\frac{14}{17}$

This ratio compares one part to another part.

Use a ratio to compare the number of cats to the total number of pets.

14 to 31

14:31

$\frac{14}{31}$

This ratio compares one part to the whole.

Try It!

What are three ways to write the ratio of the number of dogs to the total number of pets?

Convince Me! Is the ratio of dogs to cats the same as the ratio of cats to dogs? Explain.

EXAMPLE 2

Use a Bar Diagram to Solve a Ratio Problem

ACTIVITY

ASSESS

The ratio of footballs to soccer balls at a sporting goods store is 5 to 3. If the store has 100 footballs in stock, how many soccer balls does it have?

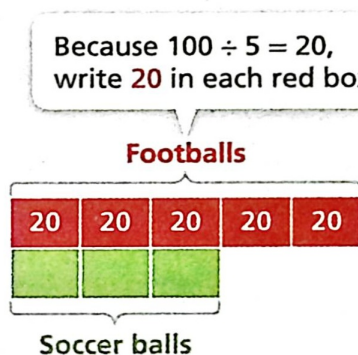

Use a bar diagram to show the ratio 5:3.

Use 3 boxes for soccer balls.

Use the same diagram to represent 100 footballs.

Each box represents the same value. Write 20 in each green box.

There are 3 green boxes, so the total number of soccer balls is 3×20 , or 60.

The sporting goods store has 60 soccer balls in stock.

EXAMPLE 3

Use a Double Number Line Diagram to Solve a Ratio Problem

Chen can ride his bike 3 miles in 15 minutes. At this rate, how long will it take Chen to ride his bike 18 miles?

Use a double number line diagram. Show 15 minutes for every 3 miles.

Count by 3s along the top number line until you get to 18 miles.

Count by 15s for the same number of spaces along the bottom number line.

Chen can ride 18 miles in 90 minutes.

Model with Math A double number line diagram can represent a constant relationship between two values with different units.

Try It!

Chen's friend Alisa can ride her bike 2 miles in 7 minutes. Use a bar diagram or a double number line diagram to find how long it would take Alisa to ride 10 miles if she rides at the same rate.

A ratio compares two quantities. A ratio can be written 3 ways: x to y , $x:y$, or $\frac{x}{y}$.
Ratios can be represented using bar diagrams and double number line diagrams.

The ratio of oranges to apples is 2:3,
2 to 3, or $\frac{2}{3}$.

The ratio of miles to minutes is 2:45,
2 to 45, or $\frac{2}{45}$.

Do You Understand?

- Essential Question** What is a mathematical way to compare quantities?

- Reasoning** What are two different types of comparisons that a ratio can be used to make?

- A science classroom has 5 turtles and 7 frogs. What is the ratio of frogs to total animals?

- Tye is making trail mix with 3 cups of nuts for every 4 cups of granola. If Tye has 6 cups of nuts, how many cups of granola should he use?

Do You Know How?

In 5–7, use three different ways to write a ratio for each comparison.

A sixth-grade basketball team has 3 centers, 5 forwards, and 6 guards.

- Forwards to guards

- Centers to total players

- Guards to centers

- The ratio of blue cards to green cards is 2 to 5. There are 8 blue cards. Complete the diagram and explain how you can find the number of green cards.

Blue cards

Green cards

In 9–14, use the data to write a ratio for each comparison in three different ways.

A person's blood type is denoted with the letters A, B, and O, and the symbols + and –. The blood type A+ is read as *A positive*. The blood type B– is read as *B negative*.

9. O+ donors to A+ donors

10. AB– donors to AB+ donors

11. B+ donors to total donors

12. O– donors to A– donors

13. A+ and B+ donors to AB+ donors

14. A– and B– donors to AB– donors

15. Which comparison does the ratio $\frac{90}{9}$ represent?

16. Which comparison does the ratio 20:21 represent?

Blood Donors

Type	Donors
A+	45
B+	20
AB+	6
O+	90
A–	21
B–	0
AB–	4
O–	9
Total	195

17. Sam is packing gift boxes with fruit. For each apple, he packs 3 plums and 5 oranges. If he puts 3 apples in a box, how many plums and oranges will Sam put in the box? Draw a diagram to solve the problem.

18. Write a ratio that compares the number of teal squares to the total number of squares in the quilt.

19. **Reasoning** Rita's class has 14 girls and 16 boys. How does the ratio 14:30 describe Rita's class?
