

Installing the Home Study Companion Files

<http://www.mathwithoutborders.com>

The *Home Study Companion (HSC)* materials are located in a folder normally distributed on an 8 GB flash drive. The entire folder should be copied to your computer. This can be accomplished in various ways depending on your computer: Right-click-Copy then right-click-Paste / Ctrl-c to copy, then Ctrl-v to paste / Drag and drop / Right-click Drag and drop / etc. Be sure that the method you use creates an actual copy, not just a shortcut (link) to the original files. After copying, eject the flash drive and make sure you can access the files within the folder you have created on your computer. Copy the files to a second location as well, as a backup. Then the flash drive can be erased and reused for other purposes. (The flash drive is merely the transport mechanism for the files.)

Please note that the End User License Agreement specifies that the license is non-transferable. In other words the program may not be sold, given away, or shared outside your immediate family. Please honor this agreement and do not share the flash drive while the files are on it.

There are other supporting files you may need to download. Begin by opening the main HSC folder on your computer and read the document, Using_the_HSC_Curriculum.pdf.

Color Code:

- Light Blue = Algebra 1, ○ Green = Geometry,
- Yellow = Algebra 2/Trig, ○ Orange = Precalculus, ○ Red = Calculus
