

Using my SuperSlate

1. Insert drill and clear plastic overlay under ledge on side of slate.

The overlay's glossy or matte side can be used.

2. Do your work on overlay with ordinary No. 2 pencil.

3. Pull drill out from under overlay.

Flip it over, so back side is up.

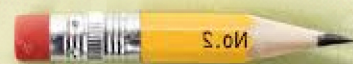

4. Slip paper back in under your overlay.

Answers are printed on back side of page and line up under your answers for easy scoring!

5. Wipe pencil marks off overlay with a dab of petroleum jelly and a tissue "kleenex," OR use Puffs Plus® brand tissues by themselves without petroleum jelly.

Done!
