Tricky Words

Teachers Notes

These readers have been written using a strictly controlled vocabulary. Text uses only **decodable regular words** (according to the week by week progression of Letters and Sounds) along with **'tricky words'**. Tricky words are frequently used words that are not decodable at this phase.

Content and Thinking Skills

Teaching basic facts about trains as a means of transport. Learning about why we have trains, the history of trains and the different types of trains around the world.

Building Science Background

The invention of trains in the 19th century changed the world forever. Children can explore how trains were built to transport people and cargo along train tracks. Learning about the different types of trains, built for different purposes, and the various ways in which they are powered to move.

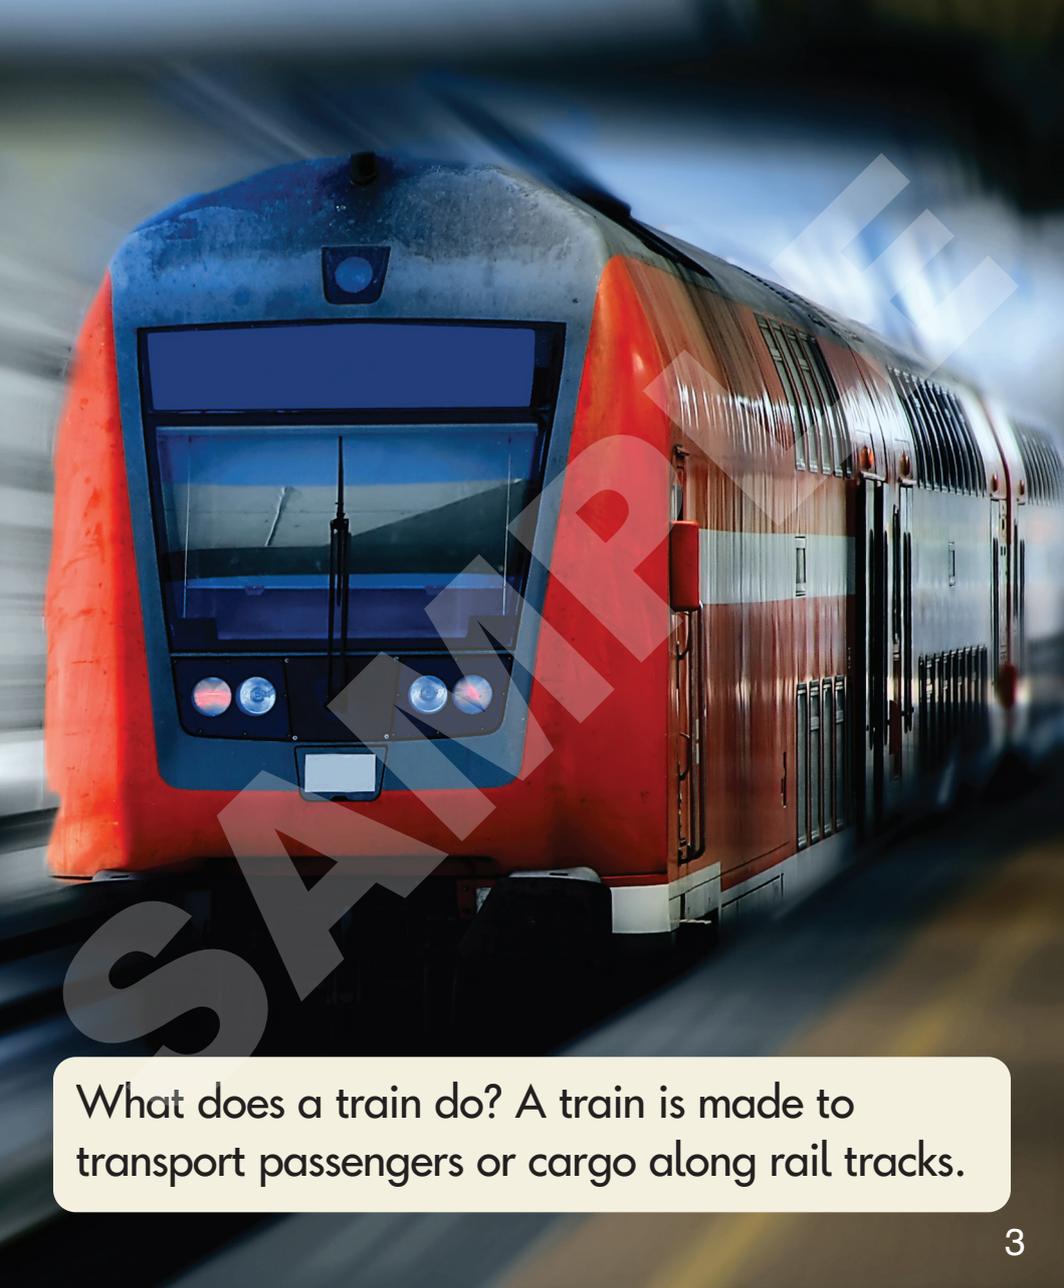

Trains

1

Do you like trains? Jump on and enjoy the ride. Come with us and learn about trains.

What does a train do? A train is made to transport passengers or cargo along rail tracks.

There are many kinds of trains in the world. There are steam engine trains, cargo trains, and high-speed trains.

The first kind of trains used ropes and horses to move. Next, there were the steam engine trains. They used steam to move along the tracks.

This is a modern train. It is electric.

The fastest trains in the world are the bullet trains in Japan.

Are you ready to hop on? Get your tickets and enjoy the train ride.
