ABOUT DRAWING AROUND THE WORLD: USA

Drawing Around the World: USA is another book in The Geography Drawing Series. This series is designed to teach children to draw, from memory, large sections of the world. In *Drawing Around the World: USA*, students learn to draw, from memory, the United States of America.

THE METHOD

Each week students study one or more new states. As they do so, they become familiar with the shape of the new states by tracing them, locating them on a map, and labeling them. To give students an opportunity to learn interesting facts about each individual state, they are asked to complete a state fact table, documenting each states' capital, area, population, and more.

To complete the table, students may research the individual states by studying a world atlas or one of several online resources; a couple of which are listed below:

50states.com Information on the states and capitals

<http://www.50states.com/>

Sheppard Software USA geography games and information

http://www.sheppardsoftware.com/web_games.htm

To streamline the completion of the state fact table, instructors may prefer to purchase ***The National Geographic Kids United States Atlas***. With this resource, students will find an alphabetical listing of states that provides, for each state, information to complete the State Facts Table.

LEARNING OBJECTIVE

To help students learn the names and relative positions of the states, students are asked to illustrate, from memory, the individual states and their locations.

Although this is a geography curriculum that utilizes drawing, it is not a drawing curriculum in the traditional sense. Students are not expected to recreate the states to scale, nor are they expected to perfectly recreate the shapes of the states.

Students are expected to learn the states and be able to create a map that demonstrates their knowledge of the states' relative positions.

Upon completion of this program, students will be more intimately familiar with the United States. They will be able to draw many of the states, from memory, and they will have a greater understanding of the position of the states, relative to one another.

WEEKLY SCHEDULE

- Day 1:** Study the New State.
Complete the State Fact Table.
Locate and label each new state onto the dashed, black and white map.
Draw all states studied thus far.
-
- Day 2:** Locate and label each new state onto the dashed, black and white map.
Draw all states studied thus far.
-
- Day 3:** Locate and label each new state onto the dashed, black and white map.
Draw all states studied thus far.
-
- Day 4:** List, from memory, the states studied thus far.
Using the blank textbox, draw, also from memory, all of the states you have learned.

(To incorporate timed drills, replace either the Day 3 or Day 4 map drawing with a timed drill. See the following page for guidelines on completing timed drills.)

Maine

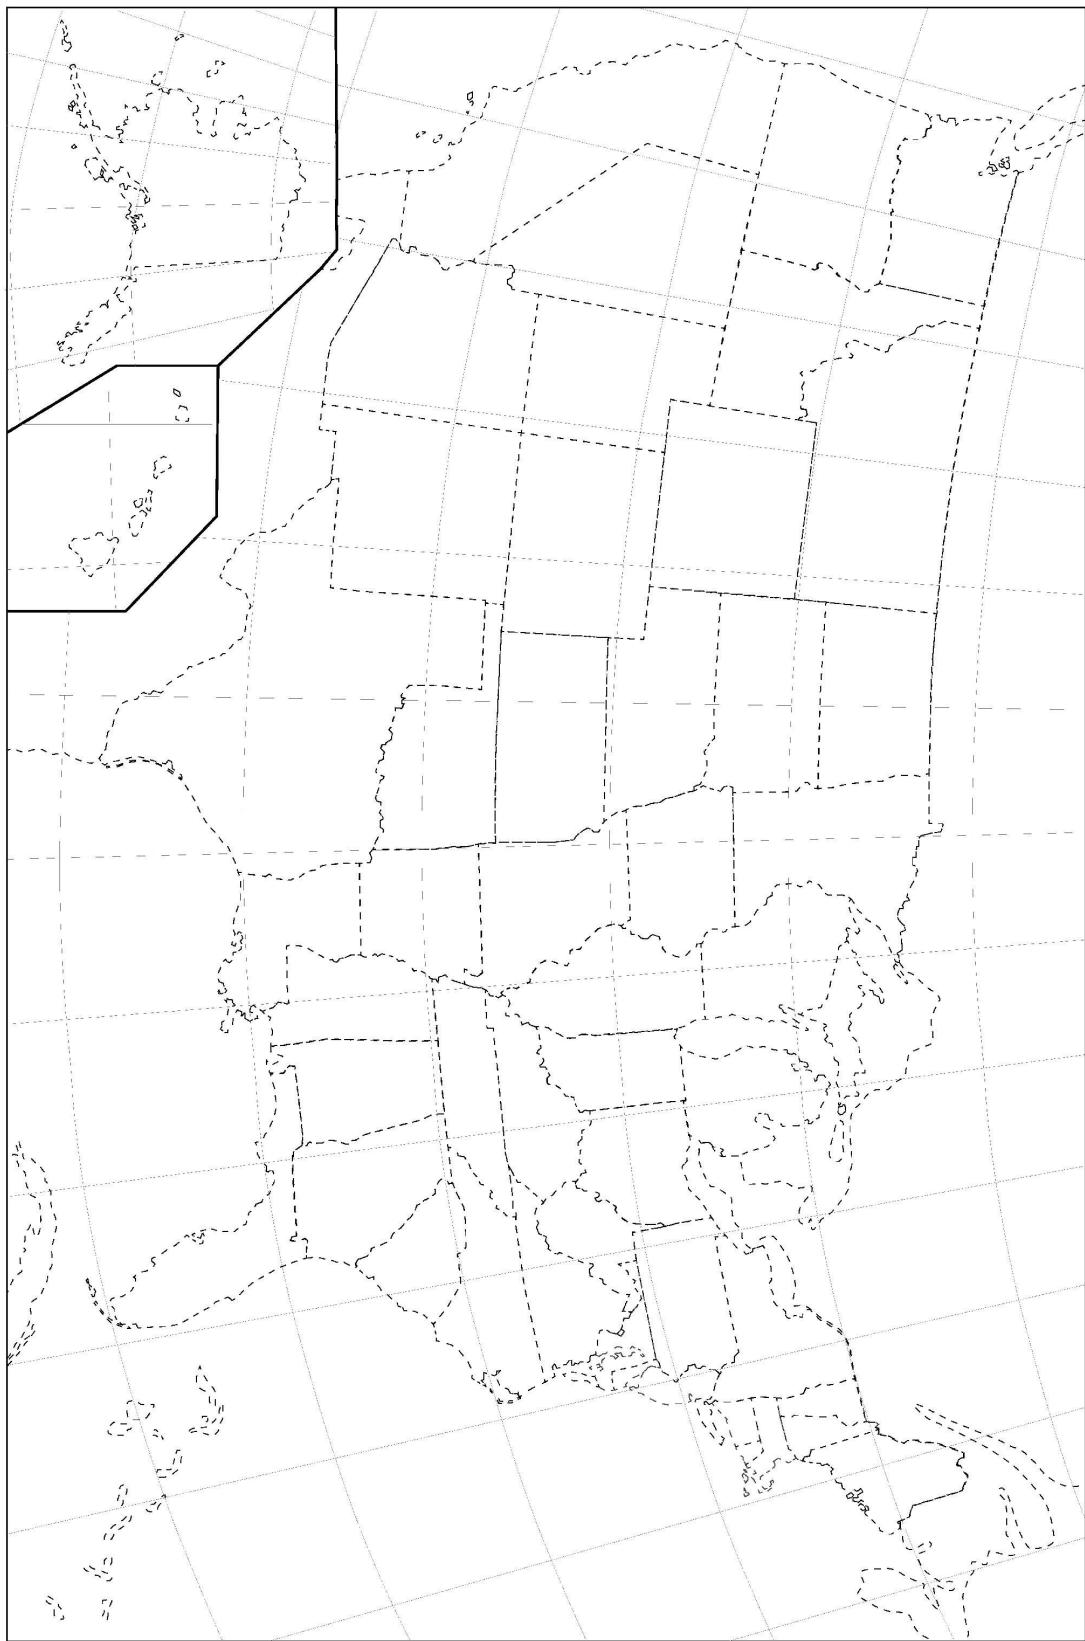

Trace the state.
Draw it in the box below.

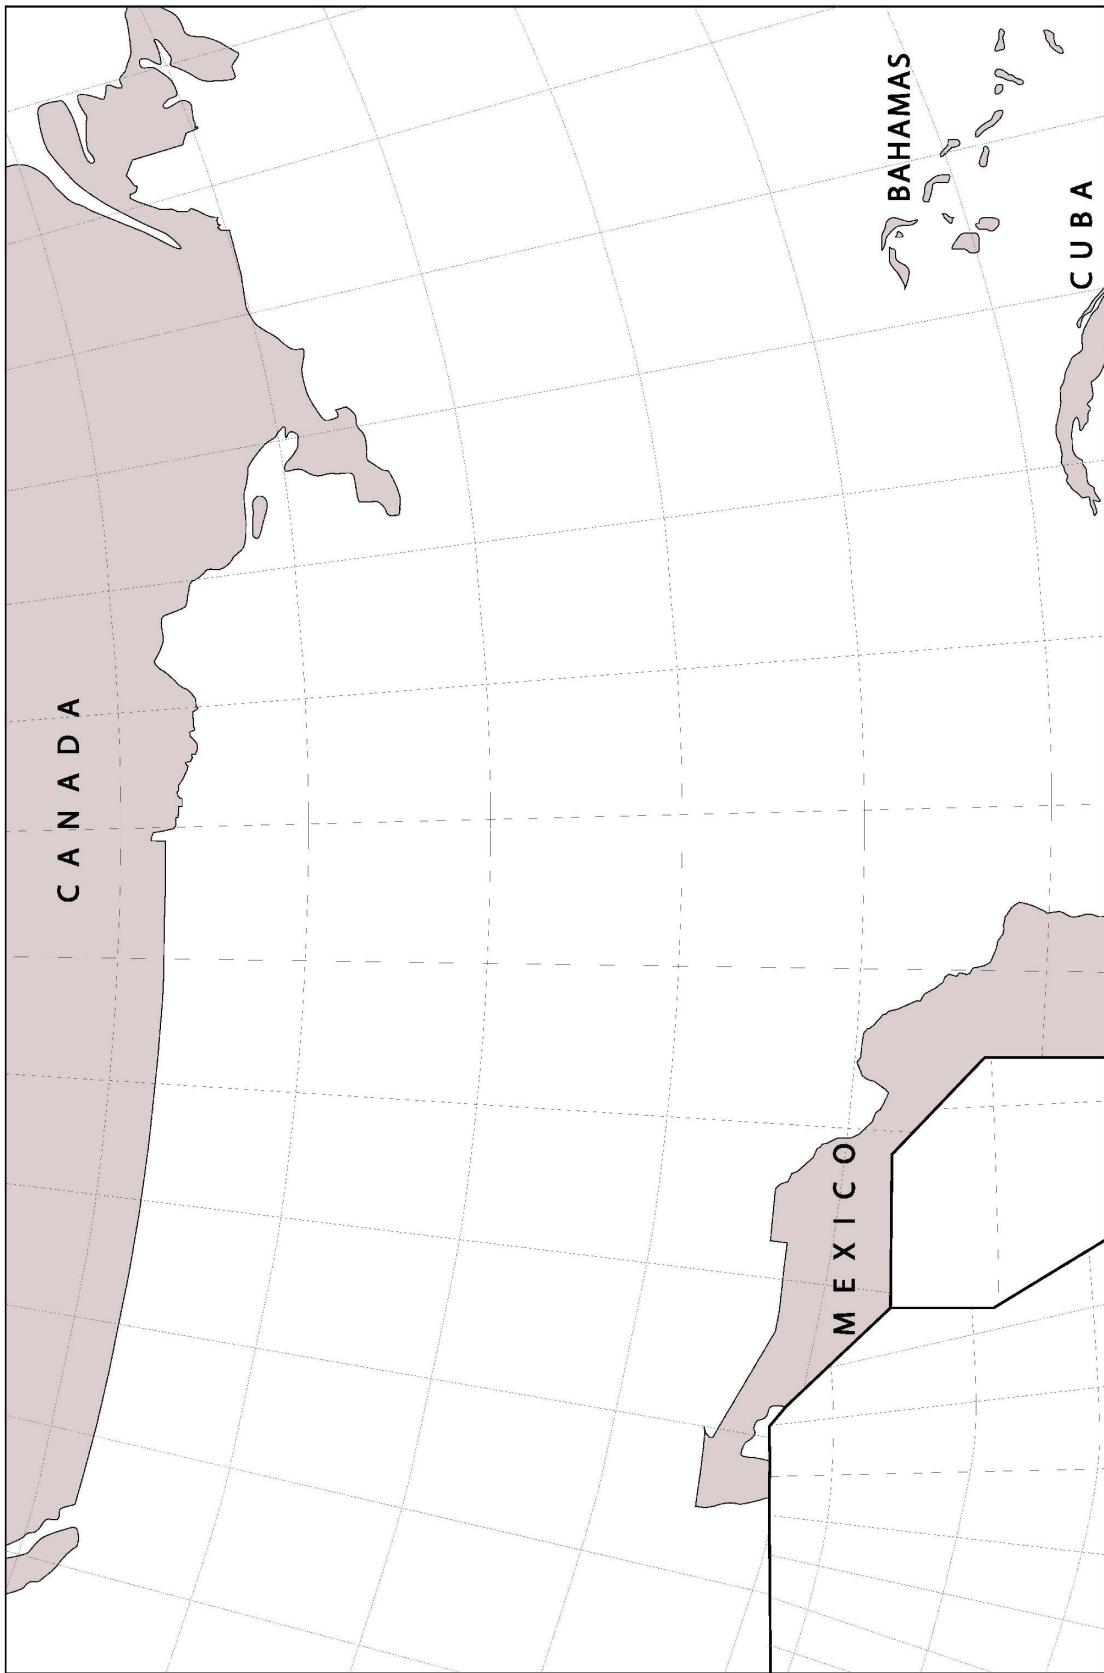

State Facts

| | |
|----------------------|---|
| Capital/Abbreviation | / |
| Area/Population | / |
| Statehood | |
| Bird/Flower | / |
| Industry | |
| Interesting Fact | |

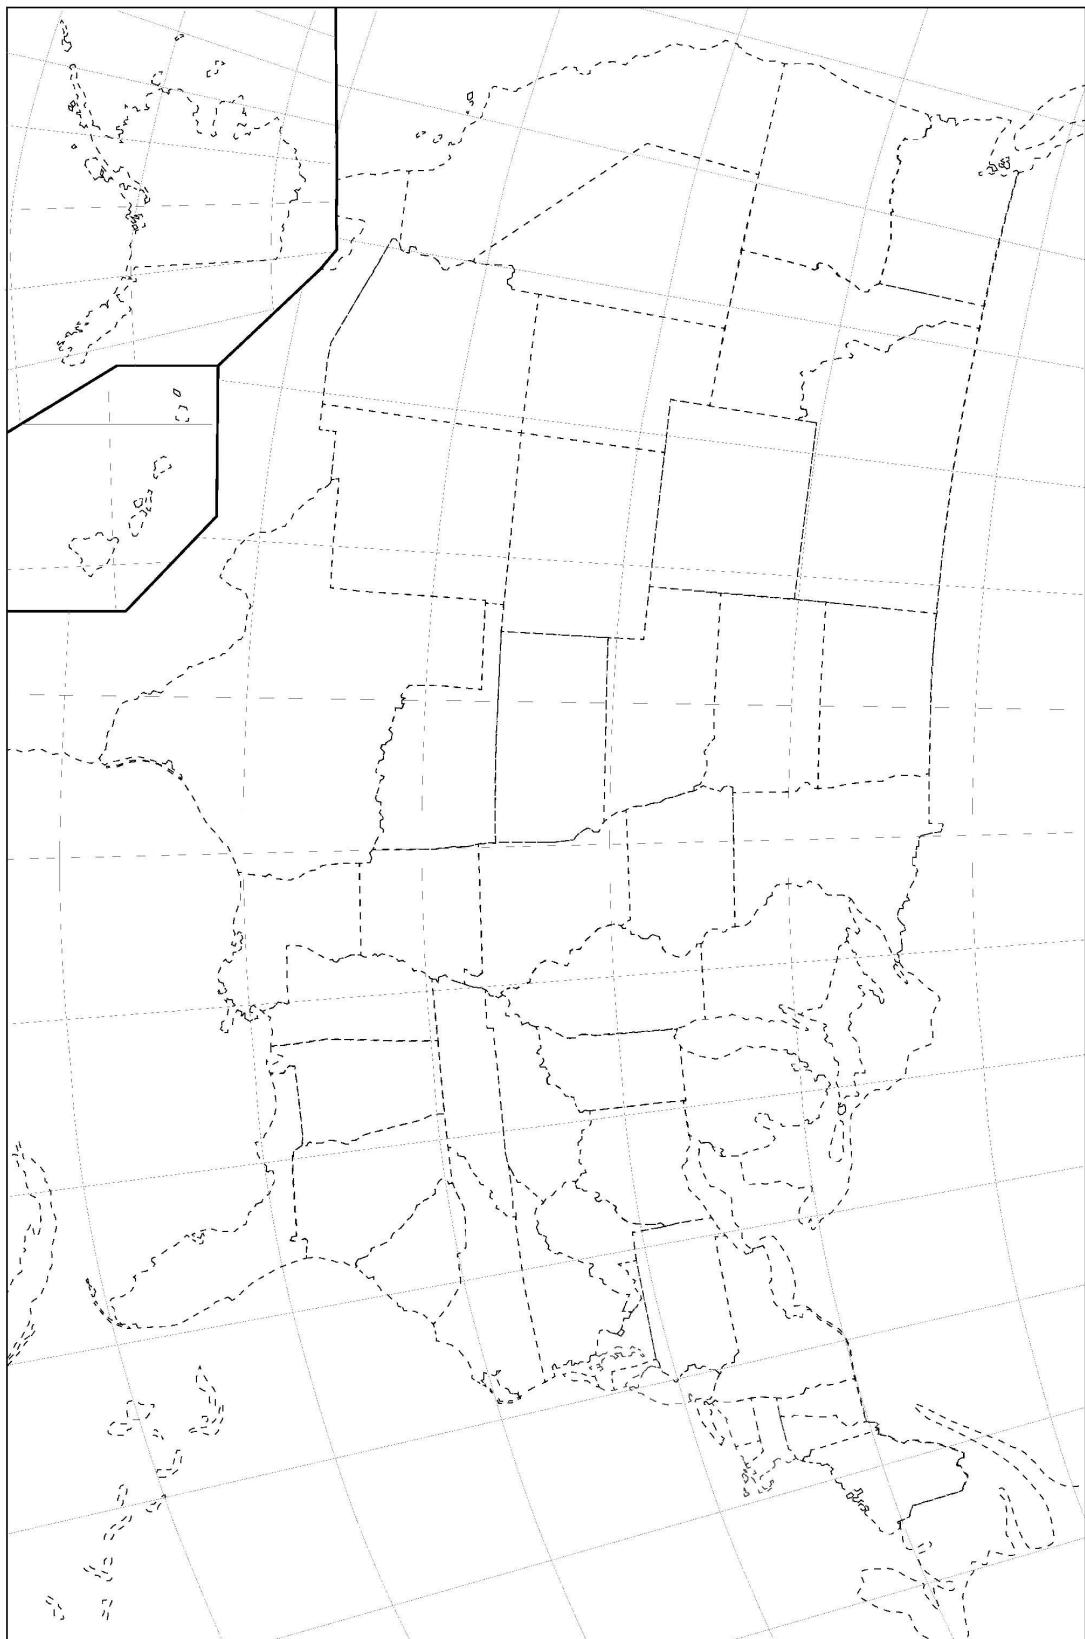

Day 1: On the map below, trace and label
the new state and capital (or states and capitals) you have learned.

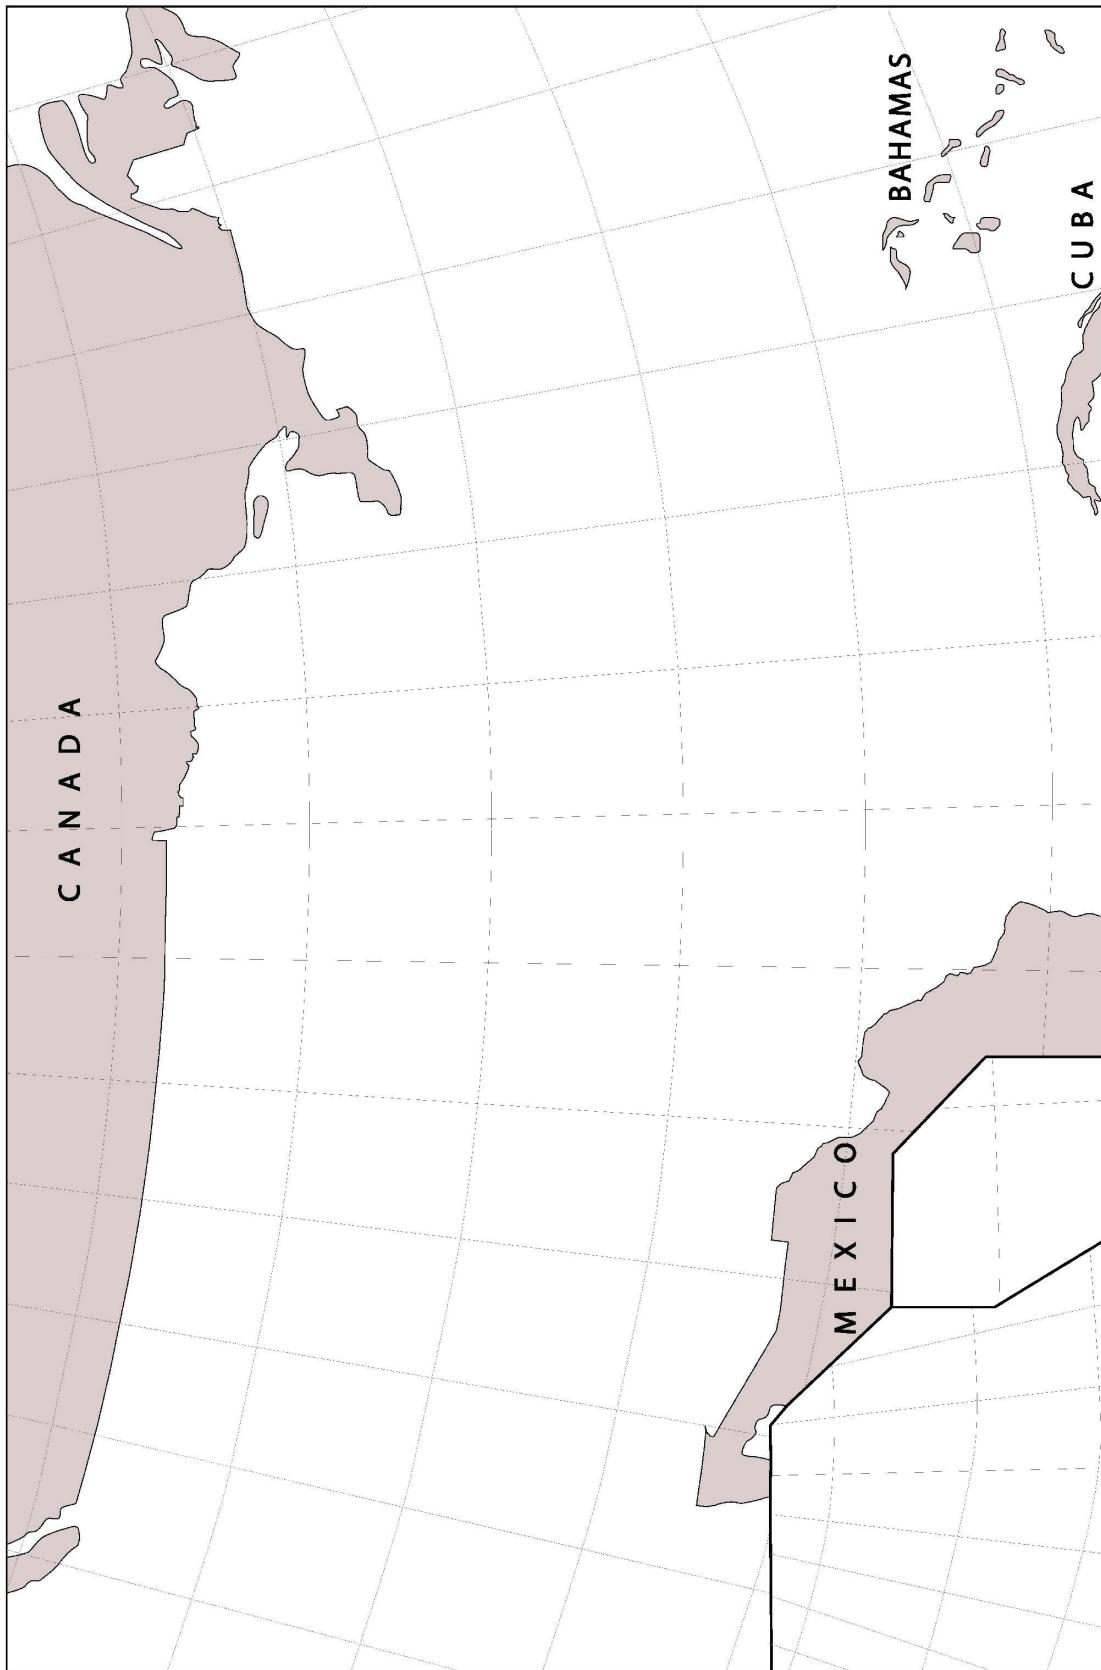

Day 1: On the map below, draw and label the new state (or states) you have learned. Add the capital(s).

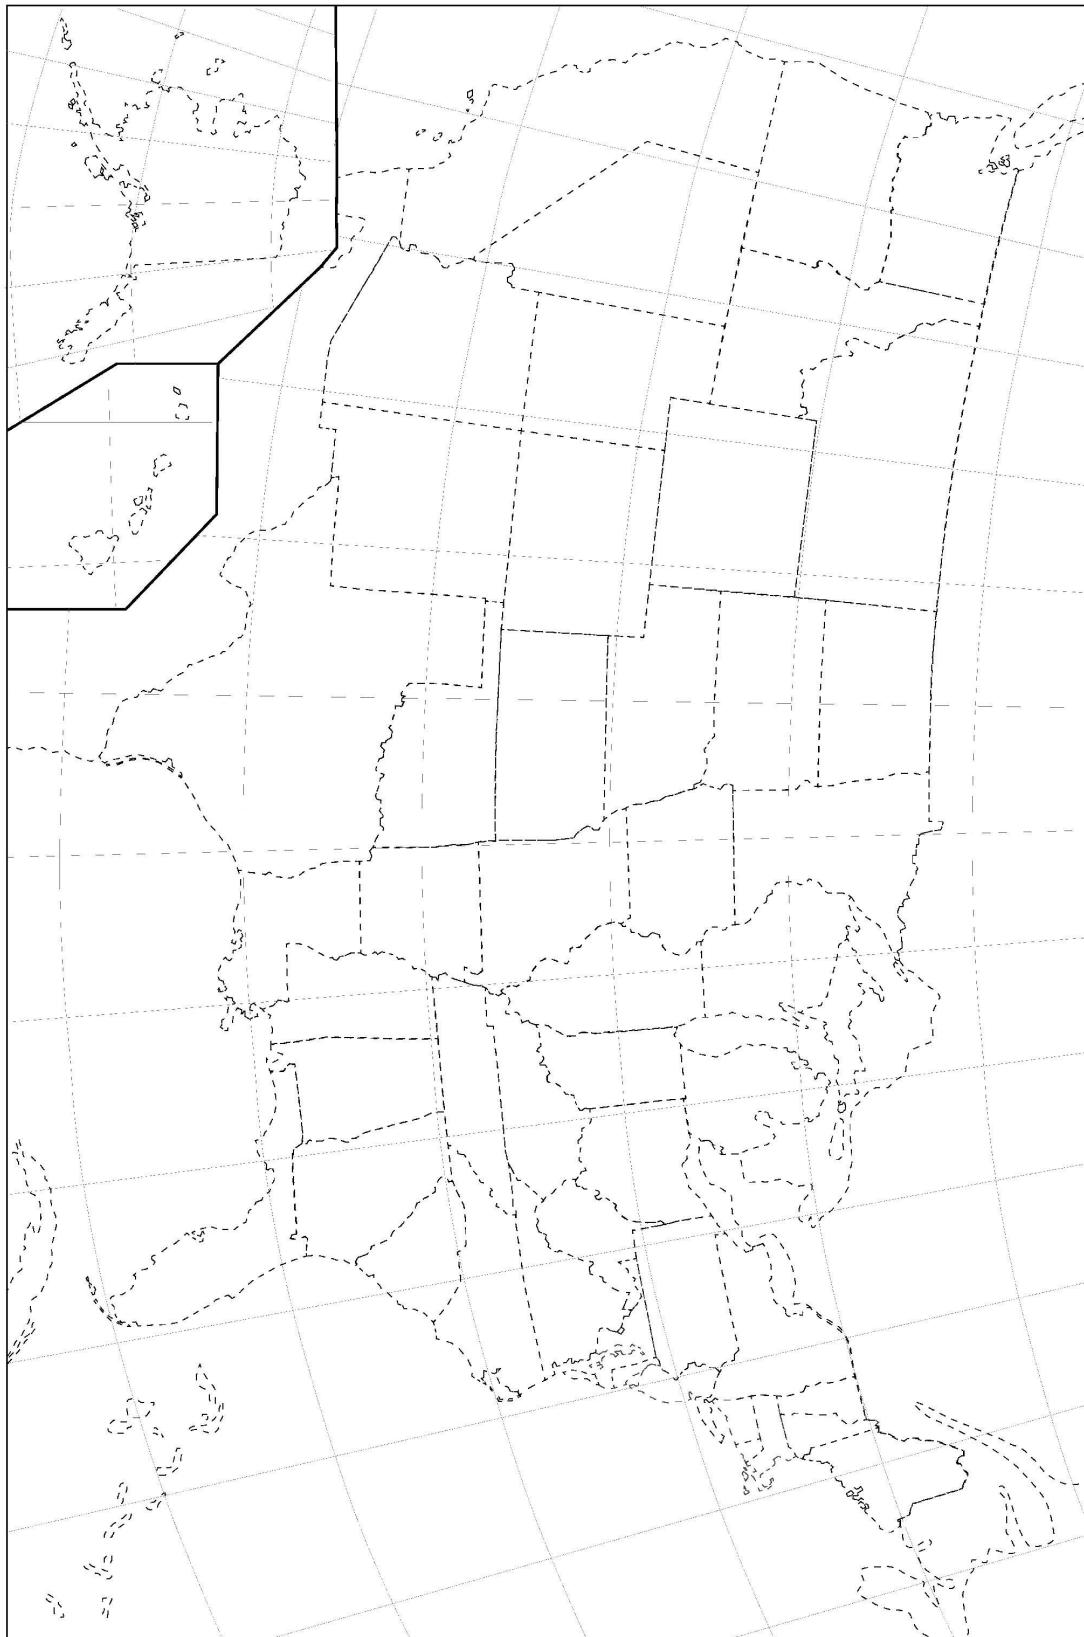

Day 2: On the map below, trace and label all of the states and capitals you have learned.

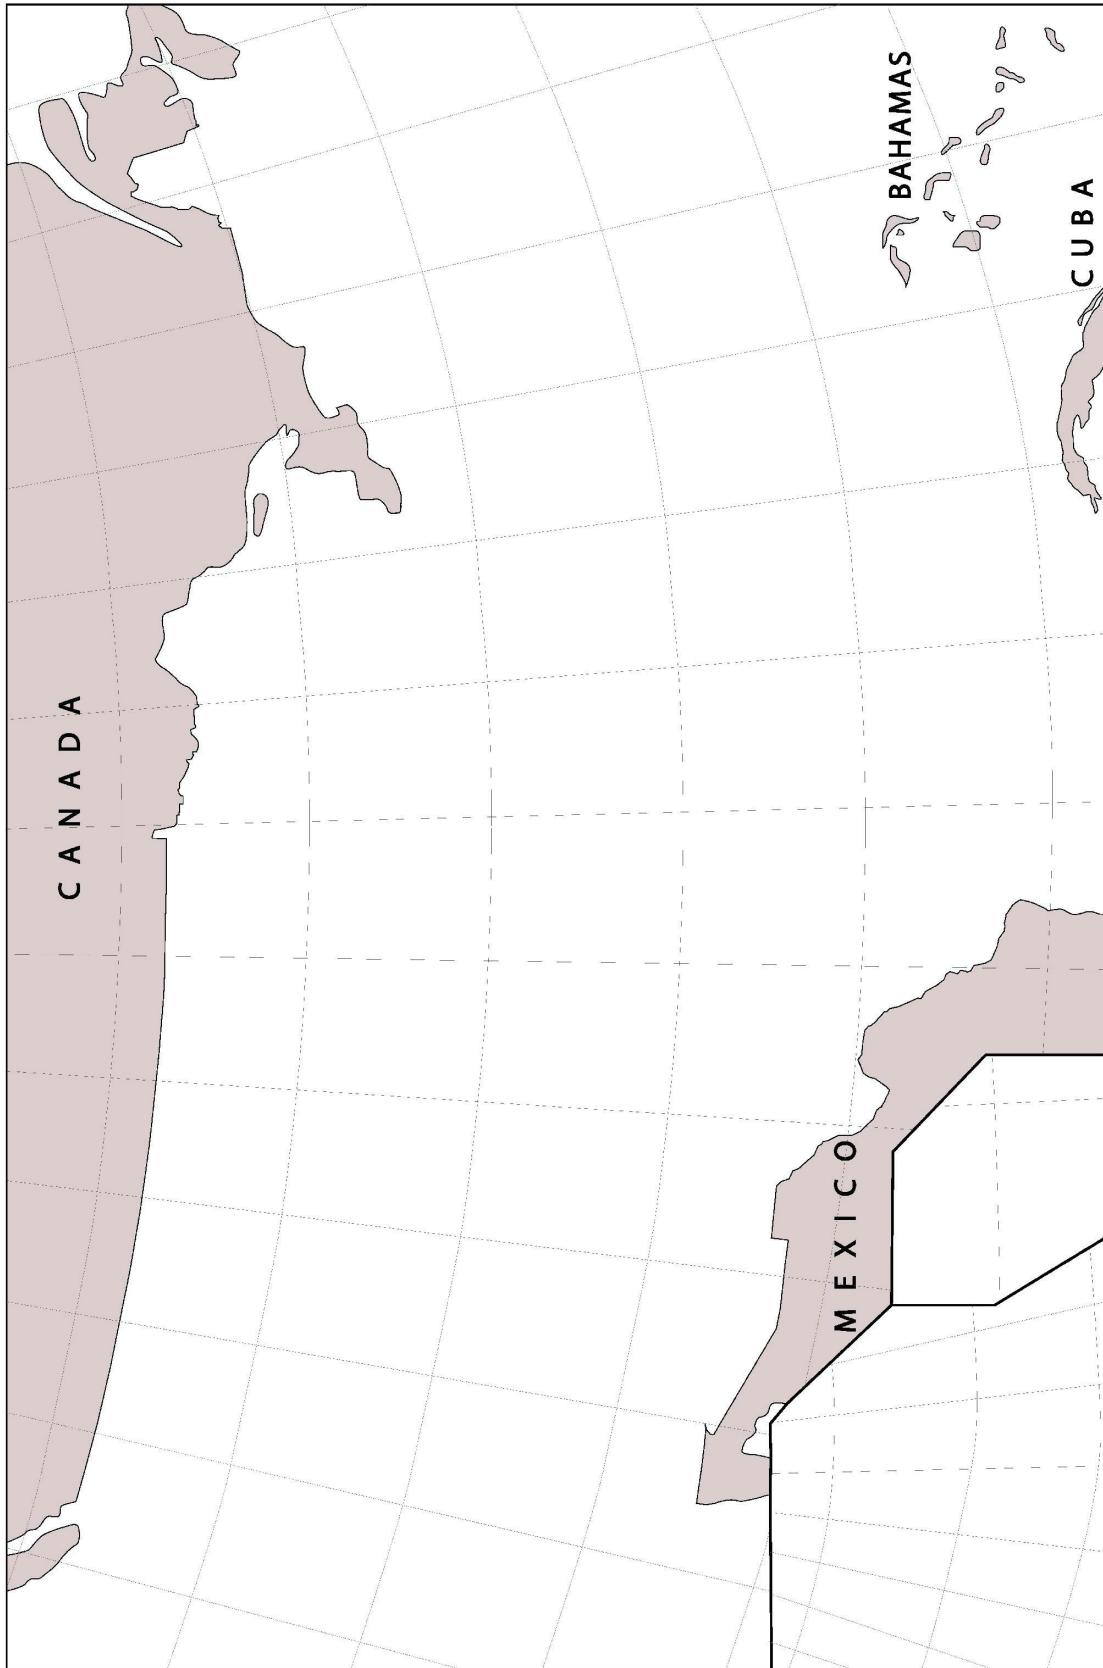

Day 2: On the map below, draw and label all of the states and capitals you have learned.

Day 3: On the map below, trace and label all of the states and capitals you have learned.

Day 3: On the map below, draw and label all of the states and capitals you have learned.

Day 4: On the lines below, list all of the states you have learned. On the small line, write the state abbreviation.
