Welcome to the Rainbow Resource Center Christmas & Gift Catalog!

First of all, thank you for picking up this catalog! There are so many ways to shop today, but we still believe there is value in browsing through the pages of a catalog—especially if you're looking for gift ideas. As a homeschooling retailer, our goal is to offer families the best educational products that build creativity and thinking skills, provide good value, and offer kids an alternative to screens. You'll find great gifts for a variety of ages, from ages 4+ to 14+. We've made a few changes to the catalog this year, and we'd love to hear what you think. First, we have included larger images! We have also reduced the number of listings on some pages but also include a QR code so you can shop all items. What hasn't changed this year is that we are still a family-owned business located near the small town of Toulon, Illinois, with an incredible and dedicated team. The people who purchase inventory, restock items, answer the phone, pick and pack your order all work on the same road and know each other by name. Some are even related! From our family to yours, we wish you a Merry Christmas and Happy New Year!

For the Glory of God,

Bob & Linda Schneider and family, and all your friends at Rainbow Resource Center

Christmas Cover: ***"I'll Be Home Fir Christmas!"*** features Bob Schneider with grandkids: Jackson, Gemma, Ariana, and Canon. Photography by David Price; with AI-generated snow. Layout design by Emily Lancaster & Megan Smith. Fresh cut Christmas tree from Cinnamon Tree Farm in Brimfield, IL.

This is repeated each night until Christmas Eve, when the star is placed atop the nativity stable. On Christmas Day, your kids can make their way with the Three Wise Men to the stable, finally finding the star and baby Jesus in his manger!

AirFort® (ages 3+)

Forget moving furniture, bringing out all the blankets, and holding down tricky corners with stacks of books; all you need to set up this fort is a box fan! Just attach the hook-and-loop fasteners on the fort to the fan, turn the fan on, and watch the fort inflate in seconds. Made from parachute fabric, the main fort area measures about 6.5' across and 50" high. A tunnel with a mesh divider connects the dome to the box fan which minimizes the air flow so that there is no windy blast inside the fort. When the fort is inflated it hovers just off the ground and kids can simply lift up the edge to run in or out. AirForts tear down as easily as they go up, and you can stuff it into the included carrying bag until the next time you need an instant fort!

Ticket to Ride® (ages 8+)

This game has become one of our family favorites. Players draw tickets to connect rail routes between major cities and attempt to complete them in the most direct route possible. Routes are built in sections of 1 to 6 railcars based on playing cards of the designated color for the section. Longer routes and longer sections score more points than shorter ones. Since routes can have sections that overlap, competition for certain segments adds to the excitement. Strategy is not too complicated, so younger players are not at a disadvantage. Games take from 45 to 75 minutes, depending on the number of players. The basic game is based on North American geography, while TTR Europe has slightly different rules and covers Europe and eastern Asia. There are many more expansions and editions available in other geographic localities, each with its own geographic challenges to overcome. Expansions require *Ticket to Ride* or *Ticket to Ride Europe* to play. Happy travels! 2-5 players. ▲CHOKING HAZARD (1). Not <3yrs.

Castle Panic® (ages 8+)

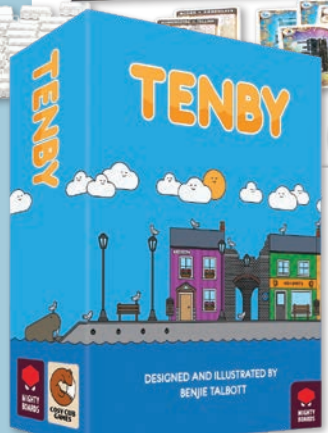

Goblins, orcs, and trolls are attacking the castle, and it's up to you and your fellow generals to defend it! In the center of the board is a six-tower castle, bordered by six walls. There are Swordsmen, Knights, Archers, and the Forest, from which monsters and other unwanted bad guys emerge. Each turn, players can discard, trade, and play cards. These cards allow players to draw extra cards, rebuild walls, or attack advancing monsters. At the end of each player's turn all monsters advance towards the castle, destroying walls or towers if they are close enough, and two extra monster tiles are drawn and placed on the board. Calamitous surprise tiles drawn mean it's time to panic! The goal is to make it through the entire monster pile without losing all the towers. You can upgrade the difficulty with different variants. Catan® (ages 10+)

This game is the perfect blend of strategy and luck. What really makes this game unique is that the game board is different every time you play, which keeps the game fresh and the strategy ever-changing. The primary contention in the game comes from settling around various resource tiles. Each tile on the board represents one of five different resources. Number tokens, ranging from 2-12, are placed on each tile. The game begins with an initial settlement phase, where each player gets to place two settlements on the corners of the resource hexagons. Any player who has settled on a tile whose number is rolled receives resources. Each player's turn typically consists of three "phases": rolling the dice to produce resources, trading (for needed resources), and building (using the resource cards in their hand to build roads, settlements, or cities or buy development cards). The object of the game is to be the first player to reach 10 points, which are accumulated through developments like settlements, cities, having the longest road or largest army, etc. There are many different routes to victory, and those who conquer them will successfully settle the isle of Catan. 3-4 players (*5-6 Player Expansion* allows for up to 2 additional players); game time is approximately 60 minutes. Exit® the Game (ages 12+)

Doing escape rooms with your friends and family is a real treat. The puzzles in these games are just as complicated as the real thing and don't require an app or batteries. First, look around the "room" to find clues and riddle cards. The puzzles are an interesting mix of logic, leaps of logic, and activities. Word scrambles, dot-to-dots, magic eye pictures, word riddles, scraps of letters and numbers, and chemical tables are some of the "pieces" of the brain teasers you may encounter. When you figure out a riddle, check your answer with the decoder disk. If you get stuck, consult the help cards for clues. Tally your score by how long it took and how many help cards you used. Each title is for one play only, since you will mark up, tear, fold, and cut the materials. Each game has a difficulty score from 1-5, easiest to hardest. The rest of your team works together to decide which card or cards you are trying to link. Two hundred double-sided code name cards and 40 different key cards mean this game can be played over and over again. Mastermind® (ages 8+)

Can you create a code your opponent can't crack? In this classic two-player strategy game, the rules are simple: one player acts as code-maker and arranges four colored pegs behind a shield on his/her end of the board. Then it's up to the code-breaker to crack the code, trying to duplicate it. After the code-breaker places a row of four pegs, the code-maker uses white and red pegs to give the code-breaker feedback. A white peg means a peg of the right color, but the wrong position. A red peg means that one of the pegs is the correct color and in the right position. The code-breaker has no way to know which one is right without some trial and error!
