

Please visit <https://www.aplustutorsoft.com/> and click on the **Activate My Order** button in the upper-right corner. Enter your “**activation code**” and click on the “**Activate Order**” button. Please select appropriate option(s) to activate. If you are a returning user, login with the parent username and password. If you **do not have an online account** with us, **Register as a New User**. Here you will create a parent profile.

Once you have activated successfully, please visit <http://www.aplustutorsoft.com> and click on the “**Log In**” button to enter parent username and password to access “**Family Math Package**”. Please note that your Username and Password are “**case-sensitive**”, so be sure to enter them exactly as you had specified.

### **Create Student Accounts:**

Once logged in, you will see the “**parent**” dashboard. Please click on “**View/Manage My Student(s)**” to create student account(s) and/or enroll students. You may select “**View/Launch My Online Math**” to see a list of active subscriptions. You can launch the program from the “parent” account by selecting an appropriate “**Launch**” button for each active subscription to see the curriculum contents, familiarize yourself with different features of the program, monitor student progress and to set parameters in “Parental Controls” to optimize program features for your student.

**WARNING: Each student MUST user his/her own account to login to work with various parts of the program.**

Be sure to create student account(s) and enroll students in appropriate grade level. Please ensure that each student uses his/her own account to log in and work on various lessons and assignments. This will ensure proper tracking of all student work.

### **A little more about the program and how to use it...**

This **Family Math Package** includes everything you and your kids need to make learning math easy and stress-free for your specific needs. It teaches and grades for you which will save you valuable time. It includes 8 different grade levels (1<sup>st</sup>-6<sup>th</sup>, Pre-Algebra and Algebra 1) allowing you to place each one of your students in a desired grade level and even change the grade level. It includes **video lessons, interactive review, practice worksheets, chapter tests, Step-by-step solution to each problem, easy to read progress reports, automatic grading & tracking, printable worksheets, chapter tests & lessons, and much more...** It also includes some features that you can optimize to meet your specific needs.

### **3 Steps to getting started:**

**Step 1: Learn** - Students start the lesson from the Table of Contents. (Click on the “+” sign next to each chapter in the Table of Contents to see a listing of lessons and click on the lesson name. We recommend starting with first lesson in chapter 1 and working down the list.)

**Step 2: Interactive Review (Q/A)** - After each lesson, we recommend that student work with the interactive review. The program will point the student to click on an **Interactive Q&A** button. This is where program will ask a few questions about what was taught in the lesson. Program automatically re-teaches if student answers any questions incorrectly. This is a great way to make sure student is actually learning as it provides immediate reinforcement.

**Step 3: Practice w/ Online Worksheets** - We recommend students complete online worksheets for each lesson. This is like homework. This will provide extra practice to apply the learning to problem solving. After the status changes to “completed”, student can review each question and check step-by-step solution if needed.

Please note that the program does the **Grading and Tracking** for you. You will be able to check student progress easily from the Parent’s Dashboard.

We also have **Chapter Tests** in our program. After student has completed all lessons in a particular chapter, we recommend that student take a **Chapter Test**. This is a great way to assess student’s learning progress. If the Chapter Test reveals any gaps, student can always go back to any lesson in any chapter to review/re-learn and close the gap. We have few other **Extra Features** (very useful and powerful) that make this program even more flexible – ***Parental Controls, Generate Additional Worksheets, Generate Additional Chapter Tests, Cumulative Review Tests, Printable Worksheets & Chapter Tests etc...***
