TABLE OF CONTENTS

Introduction		4
Lanforms and Geologic Features		5
	Building Up the Crust—and Moving It Around	
Chapter 1	An Introduction to Geology J Harlan Bretz, Geologic Laws	6
Chapter 2	Plate Tectonics Alfred Wegener, Parts of the Earth, Tectonic Plates, Plate Boundaries	12
Chapter 3	Folding, Faulting, and Intrusion Direction of Force, Folding, Faulting, Intrusion	18
Chapter 4	Earthquakes Location, Seismic Waves, Other Seismic Events	24
Chapter 5	Volcanoes Classification, Mafic Lava, Felsic Lava, Intermediate Lava, Other Forms of Volcanic Activity	28
	What the Crust is made of—Rocks and Minerals	
Chapter 6	Minerals A Little Chemistry, Characteristics, Classifying Mineral Compounds, Mineral Groupings, Industrial Uses, Types of Rock, The Rock Cycle	36
Chapter 7	Igneous Rock Types of Igneous Rock, Classification, Chemical Composition	42
Chapter 8	Sedimentary Rock Bedding, Kinds of Sedimentary Rock	46
Chapter 9	Metamorphic Rock Types of Metamorphism, Classification	50
	Wearing Down the Crust	
Chapter 10	Weathering of Rocks Conditions Affecting Rate of Weathering, Physical Weathering, Chemical Weathering	54
Chapter 11	Hydrology and Erosion The Water Cycle, Runoff and Erosion, Rate of Runoff, Deposition	58
Chapter 12	Waterways and Erosion Processes of Erosion, Rivers, Floodplain Characteristics	62
Chapter 13	Groundwater Porosity and Permeability, Infiltration, Ground Water Erosion	66
Chapter 14	Mass Movement Slope Conditions, Classification, Creep, Flows, Rockfalls and Rockslides, Subsidence	70
Chapter 15	Glaciers Kinds of Glaciers, Growth and Shrinkage, Movement, Erosion, Sediment and Meltwater Landforms from Till, Landforms from Outwash, A Word about Permafrost	74
Chapter 16	Wind Erosion Factors Affecting Rate of Wind Erosion, Causes of High Wind Erosion, Landforms Created by Wind Erosion	80
Chapter 17	Soil Weathering of Rock into Soil, Organic Matter and Organisms, Soil Profiles, Soil Groups	84
	More Information	
Chapter 18	Topographic Maps	88
Appendix	Lyric Sheets, Notes, Bibliography, Index	93
